AMBULANCE ENTRANCE, BELLEVUE HOSPITAL

BELLEVUE AND ALLIED HOSPITALS

ANNUAL REPORT FOR THE YEAR 1914.

New York, January 1, 1915.

Hon. JOHN PURROY MITCHEL, Mayor:

Sir:—In behalf of the Trustees of Bellevue and Allied Hospitals, I beg to submit the following report for the year 1914.

THE DEPARTMENT AS A WHOLE.

Owing to the opening of the new pavilions I, K, L and M of Bellevue Hospital, the additional wing and nurses' residence at Harlem Hospital and the new Ocean Beach Hospital, the Trustees have had to ask for a considerable increase in the salaries and wages account of the annual budget. The chief provisions of the estimate, as asked for by the Board, upon the recommendation of its Budget Committee, can be summarized in the following propositions:

1. Provision was made for increases in salaries and wages to the amount of \$31,740, and for the sum of \$194,417.03 for new and additional positions, in accordance with a detailed list which has been presented to each member of the Board.

2. In addition to these amounts, a request was made in the estimate for the renewal of the full sum of the appropriation for salaries and wages granted for 1914.

3. And also for the renewal of all supplemental appropriations that have been obtained or requested from January 1, 1914, to date.

4. The request of the Gouverneur Hospital Medical Board for the appointment of a paid pathologist was denied.

5. The request of the ambulance drivers for an increase in salary was denied.

6. Provision was made in the estimate for the rent of the Bellevue Day Camp for Women, provided it would be placed under the jurisdiction of the Board of Trustees.

7. The request of the Director of Laboratories for the creation of the place of Assistant Director of Laboratories was approved.

8. The estimate provided for the additional employees necessary for the proper administration of pavilions I, K, L and M of the new Bellevue Hospital, the new pavilions and nurses' residence at Harlem Hospital, and the new Ocean Beach Hospital.

9. Provision was made for the payment of day wage employees if absent on militia service.

10. The payment of salaries to fourteen additional physicians and surgeons in the Out-Patient Department of Gouverneur Hospital was provided for in the estimate.

11. The request of Dr. A. M. Shrady, dated June 15th, was considered, together with a communication from the Association of Tuberculosis Clinics, under

date of July 8th, and provision made for three additional physicians and two nurses for the tuberculosis clinic at Harlem Hospital.

12. The recommendations of Dr. James Alexander Miller, set forth in his letter of June 10th, that the salary of a resident physician for the tuberculosis wards of Bellevue Hospital and of the nurse in charge of the Bellevue Settlement House be included in the estimate were approved, and the request for the appointment of a statistician and a stenographer for the tuberculosis clinic was denied.

The Budget Committee made the following estimates:

For Supplies	\$746,907.97
For Equipment	143,144.77
For Materials	27,000.00
For Contract and Open Order Service.....	69,644.38
For Contingencies	9,500.00

Total.....	\$996,197.12
------------	--------------

For Salaries and Wages:

Administration	\$54,110.00
Hospital Service, Bellevue Hospital.....	492,516.00
Nurses' Residence, Bellevue Hospital.....	16,668.00
Gouverneur Hospital	98,676.00
Harlem Hospital	136,393.50
Fordham Hospital	64,365.50
Ocean Beach Hospital.....	22,830.53

Total.....	\$885,559.53
------------	--------------

BUDGET TOTAL	\$1,881,756.65
--------------------	----------------

Later it was resolved, in view of the economic situation arising out of the European war, to withdraw from the departmental estimate for 1915 all increases in salaries and wages, and therefore the resolutions approving of such increases were rescinded.

The Corporate Stock Budget of the Department has been made up as follows:

Very Urgent.

Furnishing new ward wing Harlem Hospital.....	\$25,000
---	----------

Urgent.

Construction of pavilions F and G, Bellevue.....	800,000
--	---------

Additional wing of Training School, Bellevue.....	200,000
---	---------

Necessary.

Additional wing of Fordham Hospital.....	260,000
--	---------

Desirable.

Nurses' residence, Gouverneur.....	150,000
------------------------------------	---------

Power plant at Bellevue.....	200,000
------------------------------	---------

Proper fire protection at Bellevue Hospital.....	17,000
--	--------

making a total of \$1,652,000

It has been found necessary to ask for special revenue bonds in the amount of \$76,000 to meet the deficit in the annual appropriations to this department. This has been allowed.

Supplementing this, an issue of special revenue bonds in the amount of \$14,800 has been needed to pay the salaries of the additional nurses rendered necessary by the provision of the Boylan Act, to provide for the care of drug patients, and for the care of sick nurses and doctors in Minturn Hospital, where the rates have been increased.

Although there was an increased census of slightly over five per cent., of patients and employees, the department was able to effect a saving of approximately \$19,000 for food supplies. Despite this fact, however, the appropriation fell short of the amount needed for this purpose.

The Trustees found it necessary early in the year to ask for special revenue bonds for the purpose of constructing a temporary dock for use in connection with the new Ocean Beach Hospital at Rockaway Park.

It is expected that this hospital will be ready to be turned over to the City in the spring of 1915, and should be occupied and in use during the summer of that year. The hospital, fully constructed and equipped, is the gift of the New York Association for Improving the Condition of the Poor to the City; the site for it having been found by the City. It will be devoted to the treatment and care of cases of bone tuberculosis, particularly among children, and will be modeled upon the great seashore institutions in Europe for cases of this nature.

Instructions have been issued for the report to the Trustees of all instances of sepsis poisoning in maternity cases with a view to determining and eliminating this condition so far as possible.

Proposals looking toward a joint examining board for all applicants for places on the interne staffs of Bellevue Hospital and the other hospitals of the department have been made and steps will be taken to inaugurate such a plan. As co-operation between a number of different medical colleges will have to be arranged for, the plan may be delayed in operation.

Plans are also under way for the introduction of a study of occupational diseases as exemplified in the patients of the several hospitals.

The terms of the new Compensation Law for accidents to employees have created some new questions difficult of immediate adjustment. The Trustees have ordered that employees so injured shall be cared for at the rate of \$1.50 per day, nothing additional being charged for the services of the visiting staff, and the company concerned to furnish transportation to and from the homes of these patients or to other hospitals. The Corporation Counsel has, in addition, been asked to express his opinion concerning the collection of the funds provided for under this Act. Already the law has had a considerable effect in decreasing the number of patients attending the surgical clinics of the several out-patient departments. The Trustees understand that in the cases of a number of private hospitals in the city the fees so collected under this Act have gone directly to the physicians in charge of out-patient clinics, even when these physicians are not otherwise paid for their services. Whether in cases of public dispensaries a like provision of such funds will be feasible is among the matters awaiting a decision from the Corporation Counsel.

Permission has been received from the Board of Aldermen to purchase in the open market six new motor ambulances for the use of this department. Two have been purchased during the past year at a cost of \$2,487.50 each.

The purchase of mattresses for all the wards in the hospital of the department has gone on, and the only wards now without them are the old surgical ones at Bellevue, where the furnishing of them awaits the opening of the new pavilions to which the patients of these wards will be transferred.

The Board effected its annual reorganization in February by the reappointment of Dr. John W. Brannan as President, and Mr. James K. Paulding as Secretary.

The Trustees were called upon during the year to mourn the death of one of the original members of the Board, Mr. Theodore E. Tack, whose disinterested service to the city was commemorated in appropriate resolutions.

BELLEVUE HOSPITAL.

Pavilions I and K, upon the completion of which the occupation of pavilions L and M has waited, have now been accepted by the Trustees on behalf of the city, the work of the contractors having been approved by the architects. The specifications for the lighting fixtures, the estimated cost of which is \$10,000, have

been sent to the Board of Estimate and Apportionment. Bids for the lighting fixtures of pavilions L and M were received and opened on November 23d, and the contract awarded to the lowest bidder, the Wahle-Phillips Company, for \$3,999.95. Bids for the painting of these pavilions were received on October 28th, but had to be rejected on account of their unsatisfactory character. On readvertising the contract was awarded to the Inter-Borough Decorating Company for the sum of \$3,564. In the same way the first bids received for the surgical equipment and furnishings of these new pavilions proved unsatisfactory. On the re-bidding estimates were asked on the individual lines instead of furnishings as a class and better prices were in this way obtained and the awards made.

The next division of the new hospital to be undertaken would be the pavilions F and G, and the Trustees have been advised by the architect that the shell of this building could be constructed for the sum of \$800,000, leaving the work of interior finish to be undertaken when funds become available. The Trustees have, therefore, incorporated this sum in the corporate stock budget prepared for the ensuing year.

THE NEW MORGUE.

It is a matter of satisfaction to the Trustees that an arrangement has been entered into with the Commissioner of Public Charities for the acceptance and use by that department of the new morgue. The old morgue will remain temporarily in use, but the Commissioner intends to abandon and remove it as soon as feasible.

OTHER STRUCTURAL CHANGES.

The Trustees have been compelled to ask for \$17,000 corporate stock in order to carry out the changes in the old buildings of Bellevue Hospital, recommended in the reports of the Chief of the Bureau of Fire Prevention and Messrs. Himmelwright and Porter, expert engineers in fire prevention. It will probably be necessary to continue the use of the old buildings for special classes of patients for several years to come, and it is therefore desirable that these changes be made.

It was found necessary to provide for a new floor with an additional shelter on the roof wards of pavilions A and B. The architects originally had provided a wooden slat floor for these wards and this had to be changed to accord with the regulations of the Building and Fire Departments.

The installation of the lighting fixtures in the laundry building was completed early in the summer.

MEDICAL SERVICE.

A step of far reaching importance in the internal medical reorganization of the hospital was begun by the Trustees in February last in their decision to admit women as members of the house staff at Bellevue on the same basis accorded to men, the understanding being that their duties should be in every way the same as those performed by the men internes. The fact that several women qualified at the examinations for admission rendered possible the adoption of such a step. The difficulty which has existed heretofore in providing for sufficient sleeping accommodations has been overcome. The first women internes to be admitted to the house staff were Dr. Geraldine E. Watson, Dr. Mae E. Walker and Dr. Anna Tjohnsland, who entered upon their service on the first of July.

A severe blow to the hospital and in particular to the Third Division, representing the New York University and Bellevue Medical College occurred in the deaths of Dr. Egbert LaFevre and Dr. Joseph D. Bryant, the official heads re-

spectively of the medical and surgical branches of this division. Both have been long connected with the hospital and will be greatly missed. Appropriate resolutions setting forth their service to the hospital and to the city were spread upon the minutes of the Board.

The right to nominate a pathologist who shall act under the guidance and direction of the head of the Pathological Department, has been accorded to each division of the hospital.

A paid resident physician will be provided for in the tuberculosis service next year.

The proposal to change the location of the wards and in addition to this to equip a laboratory and to appoint additional internes has been postponed until the new pavilions shall be available for use.

PROPOSED MEDICAL REORGANIZATION.

The proposed change in the form of medical reorganization has to await an amendment of the charter. The present charter provides that service on the part of the visiting staff should be rendered without compensation. A bill embodying the change proposed was prepared for submission to the legislature of 1914 but failed of passage, probably on account of the lateness of its introduction.

The first proposal was to limit the amendment so as to make possible merely the appointment of certain members of the Medical Board. Ultimately, however, it has proved desirable to word the amendment in such a fashion as to include the co-operation of the several medical colleges connected with Bellevue, and under the plan proposed by the Board of Estimate and Apportionment, these colleges will be called upon to furnish one-half of the several salaries to be paid, and this, it is understood, will be a feature of the plan still under preparation by Dr. Abraham Flexner, the expert of the Board.

The Trustees have assented to the conferring upon the colleges of the right of nomination of all medical officers upon their respective divisions so long as their connection with the hospital is maintained and the duties required of them are performed.

The bill will be submitted anew to the legislature of 1915 and the Trustees have asked for \$25,000 for the salaries of paid medical officers in anticipation of its passage.

A special ward has been set apart for the accommodation of the patients whose treatment for drug habits was made compulsory by the passage of the Boylan Act. The treatment accorded such patients requires very careful nursing, and this has rendered necessary the employment of additional nurses. The Police Department have detailed a uniformed officer to this ward, thus making it possible to treat patients who are detained as prisoners.

NURSING SERVICE.

In order to accommodate the incoming classes at the nurses' residence, it has been necessary to send some of the nurses to rooms in Osborn Hall, where a floor has been leased for this purpose. The necessary alterations have been made in order to provide a recreation room in the nurses' residence. The overcrowding in the present nurses' home is so great that steps will have to be taken in the near future to make permanent provisions for the additional nurses that will be required.

Reports, setting forth the necessary improvements, the amount of space needed, and the reasons therefore; have been made by the Board of Managers of the Bellevue Training School for Nurses and presented by the Trustees to the financial authorities of the City.

ADMINISTRATIVE AND SOCIAL SERVICE.

At the request of the Trustees, the Municipal Civil Service Commission ordered a promotion examination for the position of Assistant Medical Superintendent, and subject to their approval Dr. Mark L. Fleming was appointed to the place of First Assistant Medical Superintendent at a salary of \$3,500 per annum with maintenance, and Dr. Michael J. Thornton, formerly Assistant Alienist, was promoted to Dr. Fleming's old position at \$2,500 with maintenance. Bellevue and its auxiliary hospitals are still far behind the great hospital systems of the country in the number of higher administrative agents.

The Trustees regret to report the resignation of Mr. Arthur W. Yergin, Employment Agent, who has acted in this capacity at Bellevue for the past three years, and who has been instrumental in building up a special organization among the men employees of the Hospital. Mr. Yergin has been succeeded by Mr. Robert Link, who will continue his work along the lines already established.

An additional Social Service worker for unmarried mothers was granted by the Trustees, with the understanding that the salary should be paid from a special fund made to the bureau for this purpose.

An additional Social Service worker to assist the Jewish Division of the Social Service Department during the summer was allowed.

A plan for the training of medical social service nurses, in connection with the School of Philanthropy, has been outlined and put into operation.

STREET CLEANING DUMP.

With the operation of the new surgical pavilions the removal of the dumping board belonging to the Street Cleaning Department at the foot of East 30th Street will become a matter of vital interest. The Trustees have been informed that the Department of Street Cleaning has prepared plans for the creation of a model street cleaning district, which will involve the removal of this dump. Another local improvement will be the construction of additional basins in connection with the sewers in the vicinity of 29th Street and First Avenue.

MISCELLANEOUS.

Plans and specifications have been made for the installation of an interior telephone system at a cost of approximately \$14,500.

The Trustees have renewed their request for the assignment to them of the property owned by the City lying between the training school for nurses and the East River. It has long been the idea of the Trustees that this property should be kept free of buildings for the benefit of the adjoining nurses' residence and the training school.

The entire laundry work of the nurses' residence has been turned over to the general laundry at Bellevue. At the time the change was effected the laundry staff of the nurses' residence declined to accept transfer and temporary embarrassment was caused by the number of vacancies in the service thus occasioned. The change required more machinery to equip the general laundry for this additional work and this has now been obtained.

GOUVERNEUR HOSPITAL.

The primary requirement at Gouverneur continues to be the provision of an adequate building for the out-patient department. Preliminary plans for this building were submitted early in April by the architects, Messrs. McKim, Mead

and White. These plans received the approval of Dr. Goldwater, the department's expert in hospital construction, and the Building Committee of the Board, and the architects were instructed to proceed with the preparation of the final working drawings, which in turn were submitted to the Board of Estimate and Apportionment at the end of May. On June 18th the Trustees were notified that title had been vested in the property at the northeast corner of Gouverneur Slip and Front Street. Plans and specifications for the light and power equipment of the new building have been passed by the Department of Water Supply, Gas and Electricity, and provision has been made for drawing the current from the street main.

The site has since been taken in charge by the Collector of City Revenue, who will secure such revenue as may be due therefrom until building operations can be begun. Since then no steps have been taken to proceed with the building although conditions in the old dispensary call loudly for improvement.

The only measure likely to afford any relief to this situation in advance of the provision of a new building is the payment of salaries to all physicians and surgeons having clinics at this over-crowded dispensary. The request for this has been made by the Trustees in the past and were renewed during the year just past. As a result of these efforts a sum was granted with which to pay ten more of the physicians in attendance on this department. The salaries paid are those already paid for similar positions; namely, \$300 per annum. So discouraging are the conditions under which these doctors work that it is only by the payment of salaries that they can be held to strict accountability for the performance of their duties.

The Medical Board has been requested to arrange the service so that each Visiting Physician and Surgeon shall be on duty for three consecutive months of the year.

An X-ray laboratory service has been established at the hospital and it has been decided to make this laboratory a complete unit.

A dental clinic has been established at the hospital and it is proposed to appoint a dental interne for the greater accommodation of this service.

The appointment of a paid pathologist had to be denied on account of lack of funds.

The positions of "Cystoscopist to the Hospital," "Consultant in Gastro-Intestinal Diseases" and "Ophthalmologist to the Hospital" have been created in the interest of a more complete and well run medical service.

A rule has been adopted whereby the visiting physicians and surgeons are permitted to call upon the physicians and surgeons in the out-patient department for assistance in their rounds, subject in each case to the approval of the General Medical Superintendent. Assistance can also be obtained in the laboratory service conditional upon the approval of the Director of Laboratories.

The Committee of the Trustees appointed to inquire into the possibility of enlarging the present hospital has been notified by the architects that the walls are not strong enough to hold more than one additional story, which will be insufficient to give the space needed.

Some permanent provision for the nurses of Gouverneur Hospital is one of the problems of interest of which cognizance must soon be taken. Still greater urgency for the provision for out-patients has caused the adjournment of this problem, but the Trustees have it at heart and hope soon to be in a position to make permanent and satisfactory arrangements. Provision for this has been included by the Trustees in their corporate stock budget. In the meantime, improvements will be effected in the house now used as a home for nurses.

HARLEM HOSPITAL.

The architects for the construction of the new ward wing at Harlem Hospital report that very satisfactory progress has been made in the last three months of this year, and that with the exception of a few minor items the building may be considered finished. The general cleaning and retouching of the soiled painted surfaces only remain to be done.

Through a misunderstanding the item of furnishing the new ward wing was omitted from the corporate stock budget as at first made up. Later a request for \$30,000 for equipment was made together with \$29,000 for enlarging the mechanical plant at the power house and providing additional vault space, and this was allowed by the Board of Estimate.

The Trustees received from P. J. Brennan & Son, the building contractor, a request for an extension of four months' time on their contract, but as the date of expiration had already passed, the Board was unable to consider the request. The plans and specifications for the alterations to the main building were furnished by J. H. Freedlander, the architect, in March last, and the advertisement authorized for bids upon these plans at the Board's first meeting in June. The opening of bids has been delayed owing to an amendment of the specifications by the Board of Estimate and Apportionment. Estimates were received on December 4th under three headings—construction, heating and ventilating work, and plumbing and gas fitting. Bids for the alterations to the power house and ambulance station under the same headings were received on the same day. After investigation and report by the Building Committee it was voted to award the contract for the alterations to the power house and ambulance station to the lowest bidder, the Tower Construction Company for \$39,577, while bids for the plumbing and heating and ventilating work on this building were rejected in the best interests of the City. The Trustees also voted to reject the bids for the construction and plumbing work in the alterations to the main building to the hospital, while deferring action on the bids for the heating and ventilating work in the main building. At the following meeting of the Board, the estimate of E. Rutzler for \$3,057 for this work was accepted.

Bids were opened in February for the furnishings for the new nurses' residence, awards being made to the lowest bidder in each class of equipment.

Great delay has been experienced in obtaining from the Department of Water Supply, Gas and Electricity the approval of the plans for the lighting fixtures of this building. Bids for this work were received on September 15th, and the contract in the sum of \$2,520.45 awarded to the lowest bidder, the Mitchell Vance Company.

Two additional nurses, one for the X-ray and dental clinics and the other to take charge of the nurses' residence, when occupied, have been provided for.

A rule has been made that no cases shall be curetted except after a physical examination by the Visiting Obstetrician, or one of his assistants, and that this operation shall be performed by him or his assistant, or by a designated member of the house staff in the presence of one or the other of them.

Another rule has been effected regarding prescriptions for appliances that must be purchased from dealers. This rule provided that members of the dispensary staff prescribing such appliances must first secure permission from the Superintendent of the hospital.

At the request of the Trustees the Medical Board of the hospital has submitted a detailed plan for the reorganization of the out-patient department. The principal features of this plan are: (1) the appointment of Admitting Physicians; (2) a new staff of adjunct assistant visiting physicians and surgeons, having exclusive charge and control over the several classes of the out-patient department; (3) a readjustment of the ward service in connection with the out-patient department; (4) the

assignment of two members of that staff to assist the Admitting Physicians, and, (5) the reorganization of special services.

The Trustees are much gratified at the energy and zeal shown by the Medical Board in planning for and undertaking the execution of this plan. On its success will depend its introduction into the other hospitals of the department.

FORDHAM HOSPITAL.

An effort to improve the ventilation of the kitchen at Fordham Hospital has resulted in at least a partial elimination of the defective ventilation.

The walls of the hospital laundry have been painted and the machinery coated with aluminum paint which greatly improves its appearance.

A certificate of completion of the work of the contractor for the roof ward, having been prepared from facts certified to by the architect, was adopted by the Trustees. The claim of this contractor for an allowance of \$1,566.16 for extra work alleged to have been performed on this roof ward is still under investigation by the Building Committee of the Department.

At the request of the physicians connected with the laboratory a "diener" has been supplied, thus enabling them to do more satisfactory work.

So great has been the increase in the number of emergency surgical cases requiring operations at night that the Trustees have appointed an additional Supervising Nurse at \$600 per annum to be on duty at night. To provide for her salary it was necessary to abolish two positions as physicians to the tuberculosis clinic. These positions had been unfilled for some time and did not appear to be necessary at the time.

The matter of a claim of the L. J. Wadsworth Construction Company for a balance alleged to be due on their contract for the construction of the workshop in the grounds at Fordham was finally adjusted by the Department of Finance.

Respectfully submitted,

JAMES K. PAULDING,

Secretary.

REPORT OF THE GENERAL MEDICAL SUPERINTENDENT.

To the Board of Trustees,
Bellevue and Allied Hospitals.

Gentlemen:—I beg to submit, herewith, a report of the operations of the Department of Bellevue and Allied Hospitals for the year ending December 31st, 1914.

There were in the hospitals of the Department, on December 31st, 1913, sixteen hundred and seventeen patients. There have been admitted, sixty-one thousand, seven hundred and forty patients. The whole number under treatment during the year was therefore sixty-three thousand, three hundred and fifty-seven.

The maximum number at any one time was two thousand, one hundred and fifty-seven; the minimum, one thousand, five hundred and nineteen, and the average daily number for the year was one thousand, nine hundred and sixty-seven. Of the discharges, sixteen thousand, one hundred and eighty-five have recovered; thirty-one thousand, eight hundred and thirty-eight were improved; eight thousand two hundred and eighty-four were unimproved, and five thousand, one hundred and fifty-four died.

Five thousand, two hundred and eleven of those discharged as unimproved were transferred to other hospitals, practically all of them to the Department of Public Charities.

Analysis of the year's statistics is always interesting and instructive. The average number of patients under treatment has been larger this year. That this increase may be regarded as an incident of alleged hard times one cannot assert positively; that there is some direct relationship one cannot doubt. Other institutions, both semi-private and public, show the same experience and suggest a like explanation.

The average number of days' treatment per patient is more at Bellevue this year than last, while at each of the allied hospitals it is less, however, one cannot conclude from this that patients are kept too long or not long enough, for, like the recovery and death rate of a general hospital, to safely make any deductions one must know all the circumstances and conditions entering into or influencing the character and number of the admissions.

There have been no new or radical departures from the recognized and established policies of the hospitals during the year. The weekly "round table" conferences with the Assistant Superintendents and the various heads of departments have continued. These meetings, at which matters of general interest affecting the department are discussed, result in the adoption of more uniform methods of administration as well as a better informed working staff.

Membership in and attendance upon the meetings of the Medical Boards of Bellevue and the allied hospitals continues to be most helpful in harmoniously working out the problems that concern these bodies and the hospital administration.

Although no new construction work has been undertaken, the year has been an active one. The new roof ward at Fordham Hospital was occupied early in January. Owing to the continued high census, and to make possible a better classification of patients, the women's medical service was transferred to this

OLD BUILDINGS OF BELLEVUE HOSPITAL

new ward. To provide for the ever-increasing nursing staff, a house adjoining the grounds has been rented, making a very satisfactory annex to the present residence.

At Harlem the extension to the hospital, doubling its capacity, is rapidly nearing completion. The Nurses' Home, completed more than one year ago, and awaiting lighting fixtures, is to be formally opened in April. The houses rented for many years for the nurses have been leased for another year, it being necessary to provide accommodations for the men and women employees, pending the additions to their quarters. The contract for remodeling the present hospital it is expected will be executed early in the year and this work be completed within the next six months.

Plans for the Out Patient Department at Gouverneur were filed with the Board of Estimate in May. It is hoped this work may be released soon, as the needs are continually increasing. The money has been available for two years, while the need has been recognized by your Board for at least seven years.

At Bellevue, Pavilions L & M, I & K, containing surgical wards, operating rooms, quarters for the house staff, are nearing completion and will be opened probably in July. It was hoped with the completion and occupancy of these wards that the old buildings could be vacated. This now seems impossible owing to the increased demands made upon us. Even with the transfer of the surgical patients we are still confronted with the problem of caring for tuberculosis, erysipelas, alcoholic, habit cases and prisoners, all of whom are now inadequately housed. The so-called Boylan Law became effective in July, at which time we were obliged to set apart a ward for the care and treatment of drug cases. While we have met the situation by providing care and treatment for all persons in need of it, it is very apparent to us that these patients should remain in the hospital for a longer period than we are now able to keep them. If the improvement in their condition is to be permanent, and the probability of relapse lessened, we must provide after care for these patients until such time as they have been restored to a normal physical and mental condition.

Reference was made in the last annual report to the use of the various forms of Sero-Therapy. With the development of new serums this use has extended. A Wasserman reaction of the blood is made upon every patient remaining in the hospital more than forty-eight hours. While not compulsory, all members of the medical and nursing staffs are encouraged to be immunized for Typhoid Fever, with the result that no cases have developed.

As the report of the General Superintendent of the Training School attached hereto indicates, the Training Schools for Nurses and Attendants have been conducted on the same general lines as indicated in previous reports. But it may seem neither out of place nor immodest to chronicle at least the normal growth of a long established institution that increases in favor with its proved usefulness as a means of equipping women and men for a career of honorable service.

The School for Midwives, now in its third year, continues to increase in size and usefulness. So many applications for training have been received that it was necessary during the year to rent a house adjoining the School to accommodate the pupils. The demands upon the resident staff became so great that the position of Assistant Resident Physician, vacant since the opening of the School, was filled by the appointment of Dr. Holladay, who had completed an internship at Bellevue Hospital.

The Day Camps, maintained on the boats Southfield and Westfield, continue to care for increasing numbers. These boats are so much out of repair that the question of replacing them must soon be given serious consideration.

The more urgent needs for new and additional buildings have been presented to and are now being considered by the Board of Estimate, among the more pressing is the extension and completion of the additional pavilions at Bellevue

With the opening of the surgical wards during the summer we will practically be operating three separate and distinct hospitals within the grounds of Bellevue, making the problems of administration most difficult, increasing the cost of maintenance, and by reason of the separation of the buildings, exposing the patients to undue hardship in going to and from the admitting office, treatment rooms, etc.

The Nurses' Residence is overcrowded; during the year it has been necessary to provide for forty nurses outside—some in rooms rented for the purpose, others at a higher salary in lieu of maintenance.

A residence for nurses at Gouverneur must be given serious consideration in the near future. The three houses now rented for this purpose are inadequate, aside from the inconvenience to the nurses in having to go three blocks from their residence to the hospital.

While there were many changes in the personnel of the staffs of the hospitals of the department during the year, these changes were less frequent than in the past. This is accounted for, in a measure, by industrial conditions without, and I believe improved conditions from within. The comfortable sleeping and recreation rooms provided for the men, and the automatic increase in pay for the Hospital Helpers, has tended to keep many in the service who would have accepted positions elsewhere.

The vacancy existing in the position of Assistant Medical Superintendent was filled during the year by the appointment of Dr. Michael J. Thornton, who, for several years, had served as an Assistant Alienist.

Rev. A. Blum, Rev. Worrall and Rev. Southwell with his Assistants of the Carmelite Church, and Reverends Tinker, Byrnes, Roosevelt and Plunkett, have held the usual religious services in their respective communions.

For secular services the hospital is indebted to friends innumerable, who have not wearied in their offerings of fruits, flowers, books and a multitude of similar gifts, all of which has been of great benefit to the patients.

I desire at this time to express my appreciation of the co-operation and loyal service of my Assistants, Heads of Departments and the various employees, who have made possible whatever success has attended the labors of the year.

Respectfully submitted,

GEORGE O'HANLON.

REPORT OF THE PSYCHOPATHIC AND ALCOHOLIC SERVICES.

To the Superintendent of Bellevue and Allied Hospitals:

Sir:—I have the honor to submit herewith the Annual Report of the Psychopathic, Alcoholic and Prison Services for the year ending December 31st, 1914.

PSYCHOPATHIC DEPARTMENT.

Statistical Summary.

The total admissions to the Psychopathic wards during the year just past was 4,223 patients—2,199 men and 2,024 women; an increase of 104 patients over that of the previous year.

The distribution of these patients may be summarized in the following manner:

As in former years, a large majority of them, or 3,017 patients, 1,592 men and 1,425 women, were committed,—mainly to the Manhattan and Central Islip State Hospitals. This represents 71 per cent. of the total admissions, which is a slight decrease over that of the year 1913, the percentage of patients committed to State Hospitals during that year being 73.

The number of patients committed to private institutions directly from the Psychopathic wards was 57—30 men and 27 women.

The number of patients transferred to the Medical and Surgical wards of Bellevue Hospital was 51—32 men and 19 women—the mental condition of these patients being symptomatic of some underlying surgical or medical disease from which they suffered.

The Department of Public Charities received 78 patients—51 men and 27 women. These patients were not suffering from any mental disease, but required prolonged custodial care such as is afforded by institutions under the jurisdiction of the Department of Public Charities.

Forty-nine patients—41 men and 8 women—were returned to Courts. These were patients against whom criminal charges were pending and who, after observation, were found not to be suffering from any psychosis. The above number does not include many others with criminal charges who were sent to the Psychopathic wards during the year and committed to State hospitals, as examination disclosed that they were suffering from mental disease.

During the year, 890 patients—403 men and 487 women—were discharged to their own custody and to the custody of relatives and friends. This is the second largest group and includes cases which presented mild mental disturbances and patients suffering from well defined types of psychoses of such a nature that they could be safely taken care of at home.

The number of patients discharged to the Bureau of Deportation of the State of New York was 28—24 men and 4 women. These consisted of non-residents as well as alien patients, who were deported to the State of which they were legal residents, or to the foreign country from which they came.

Six patients—2 men and 4 women—were transferred to Correctional institutions. One man eloped from the ward.

There were 46 deaths—23 men and 23 women.

The above may be expressed in tabular form as follows:

VIEW OF OLD BUILDINGS OF BELLEVUE FROM 27TH STREET
AND FIRST AVENUE

Totals.....	2,229	2,053	4,282

CLINICAL REPORT.

The Clinical Report for the year 1914, showing a general grouping of the cases admitted to the Psychopathic wards, may be expressed in the following manner.

I. Organic Group.

This group consisted of 892 cases, making slightly less than twenty per cent. of all the whole admissions for the year. It is interesting to note that there were 25 more organic cases than the last year and more than fifty per cent. of this group was of a syphilitic origin; the number of paresis was only slightly increased—25 more cases than the past year. The study of the organic psychosis has been especially much facilitated by the aid received from the laboratory side. It is needless to state that lumbar punctures, Wasserman tests, ophthalmoscopic examinations, etc., are invariably resorted to in large number of cases, particularly in such instances that suggest an organic condition.

They may be tabulated as follows:

	Men	Women	Total
Dementia Paralytica (including 2 juveniles).....	352	111	463
Cerebral Syphilis	30	8	38
Psychoses Accompanying Tabes.....	2	1	3
Senile Psychosis	86	125	211
Epileptic Psychoses	39	27	66
Psychosis Accompanying Organic Nervous Diseases..	70	41	111

In the psychosis accompanying organic nervous disease the anatomico-pathological processes varied—in 83 cases arteriosclerosis was the underlying background; in 7 cerebral neoplasm was manifest; in four cerebral hemorrhage in the foreground; two were Huntington's chorea, one paralysis agitans and in 14 the true nature of pathological condition was not known.

II. Functional.

Of all the mental disorders the functional group represents the highest number of admission, more than fifty per cent. of all the cases admitted to the psychopathic wards were of this type. Indeed, the manic-depressive class was in predominance; it is also interesting to call attention to the fact that the allied group

is rather well represented because of the fact that owing to the relatively short duration of the patients' stay in the hospital a proper diagnostic designation is often impossible. The cases may be tabulated as follows:

	Men	Women	Total
Dementia Praecox	294	162	456
Allied to Dementia Praecox.....	147	169	316
Paranoic Condition	72	104	176
Manic-depressive Insanity	292	421	713
Allied to Manic-depressive Insanity.....	161	307	468
Involution Melancholia	5	11	16
Depression Undifferentiated	105	118	223
Hysterical Psychosis	3	10	13

Of 456 cases of Dementia Praecox, 156 (113 men and 43 women) were of the hebephrenic form; 13 (10 men and 3 women) katatonic; 212 (114 men and 98 women) were paranoid; 13 (10 men and 3 women) simple; 35 terminal (25 men and 10 women); and in 27 (22 men and 5 women) the type could not be very well differentiated.

In regard to the Manic-depressive Group, there were 161 cases (60 men and 101 women) of the depressed type; 416 (176 men and 240 women) of the manic phase and in 136 (56 men and 80 women) the mixed class.

In this connection it may not be amiss to state that during the past year there were 19 cases of involution melancholia which could not be very well classed with manic depressive group of the mixed variety as suggested by Dreyfus.

There was no history of previous attacks in any of these cases and as the clinical picture displayed all the characteristic features of involution melancholia, it was deemed advisable to keep them apart from the manic depressive group.

III. Toxic Group.

To this group belong two large classes—in one, the toxic etiology is of an exogenous nature, such as alcohol, drugs, etc., and in the other the underlying etiological factors are brought about by definite physical disease. They may be classified as follows:

Sub Group A—Alcoholic Psychosis.

Type	Men	Women	Total
Delirium	18	5	23
Hallucinatory Delusional Form.....	33	22	55
Korsakoff Form	35	29	64
Deteriorating Types	16	8	24
Paranoid State	5	4	9

Sub Group A—(continued) Drug Deliria.

Nature of the Drug	Men	Women	Total
Bromide Delirium	2	2
Cocaine Delirium	1	..	1
Morphine Delirium	1	1	2
Opium Hallucinosi.....	..	1	1

Sub Group B—Infective-Exhaustive Psychosis.

Etiology	Men	Women	Total
Chorea	2	1	3
Chronic Endocarditis	5	5	10
Chronic Nephritis	1	3	4
Cirrhosis of the Liver.....	1	..	1
Carcinoma	1	..	1
Diphtheria	1	1
Erysipelas	3	3
Graves Disease	1	1
General Debility	1	..	1
Heat Prostration	1	1
Starvation	1	..	1
Malnutrition	2	..	2
Pellagra	1	..	1
Pleurisy	1	..	1
Post-operative Conditions	1	1	2
Pneumonia	1	1
Pulmonary Tuberculosis	16	7	23
Puerperium.	17	17
Rheumatism	1	1
Typhoid Fever	1	1	2
Tubercular Meningitis	1	1
Cause Unknown	1	9	10

IV. Traumatic.

These were purely of traumatic character and do not include those cases in which trauma had been merely an exciting cause in precipitating different types of mental disease.

	Men	Women	Total
Traumatic Psychosis	6	4	10

V. Developmental.

To this group belong mental upsets accompanying feeble-mindedness and constitutional inferiority.

Idiocy
Imbecility	11	1	12
Moron.....
Constitutional Inferiority	35	27	62

VI.

Under this group were classified terminal mental deteriorations of obscure origin and psychoses, the nature of which could not be determined.

	Men	Women	Total
Unclassified	44	38	82
Dementia (cause not known).....	8	13	21

VII. Group of Transitory Psychosis.

Patients suffering from transitory mental disturbances naturally find their way to institutions of this kind. Some of these mental upsets were the expression of some definite physical disease or toxic deliria, and others were confusional states of obscure character. Because of their short duration, it is frequently impossible to determine the true nature of these transitory mental conditions.

	Men	Women	Total
Confusional States	13	5	18
Delirium (following Puerperium with Scopolamin)	..	3	3
Epilepsy	31	22	53
Acute Alcoholism	32	23	55
Delirium following Lobar Pneumonia.....	..	1	1

VIII. Not Insane.

Under this group, Not Insane, are classified cases which did not present any signs of mental disorder and others, although not suffering from any psychosis, manifested deviations and constitutional abnormalities of various kinds.

	Men	Women	Total
Hysteria	3	22	25
Idiocy	1	1	2
Imbecility	27	18	45
Moron.....	5	5	10
Constitutional Inferiority	76	64	140
Chronic Alcoholism	40	4	44
Constitutional Psychopathic States.....	6	1	7
Arteriosclerosis	6	3	9
Bromide Habitue	1	0	1
Cocainism	1	0	1
Heroin Habitue	1	0	1
Morphinism	2	3	5
Senility	10	13	23
Tæbes	2	0	2
Tertiary Syphilis	0	1	1
Tubercular Meningitis	1	0	1
Epidemic Meningitis	1	0	1
Lobar Pneumonia	1	0	1
Simulation	1	0	1
Organic Brain Disease.....	4	0	4
No Psychosis	27	13	40

ALCOHOLIC AND PRISON SERVICE.

Statistical Summary.

The total number of admissions during the year to this Service was 8,612. Of these, 7,537 patients—5,700 men and 1,837 women—were treated in the Alcoholic Wards.

The distribution of these patients was as follows:

Of the total 7,537 admissions during the year, 5,748—4,397 men and 1,351 women, were discharged to their own custody, having sufficiently recovered to be able to take care of themselves at home.

There were 508 cases—386 men and 122 women, discharged to the custody of relatives and friends. These patients, though not fully recovered, were removed at the instance of relatives or friends, who insisted that they were able to care for them.

The Department of Public Charities received 344 cases—240 men and 104 women. These patients, although recovered from their acute illnesses, were suffering from other disorders, necessitating prolonged treatment such as is afforded in the institutions under the Department of Public Charities.

There were 4 cases—3 men and 1 woman—discharged to the State Board of Charities. These patients were non-residents and were deported by the State Board of Charities to their respective homes.

During the year, 553 cases—405 men and 148 women, were transferred from the Alcoholic wards to other wards of Bellevue Hospital for the treatment of various surgical and medical conditions. Forty-two patients—31 men and 11 women, were transferred to medical wards; 75 patients—66 men and 9 women to surgical wards; 183 patients—154 men and 29 women, to tuberculosis wards; 214 patients—128 men and 86 women—to the Psychopathic wards; 39 patients—26 men and 13 women, to various other wards of Bellevue Hospital.

Twenty-five patients—12 men and 13 women, were transferred to other institutions in this city. The Social Service Department cared for 39 patients—23 men and 16 women. One woman was discharged to the Federal Government and two men eloped from the ward.

During the year there were 285 deaths—220 men and 65 women.

On January 1st, 1914, there remained in the wards 105 patients—78 men and 27 women, and on December 31st, 1914, there remained in the wards 133 patients—90 men and 43 women.

The above figures may be tabulated as follows:

	Men	Women	Total
Patients Remaining in Wards January 1, 1914....	78	27	105
Patients Admitted During Year 1914.....	5,700	1,837	7,537
Total.....	5,778	1,864	7,642
Patients Discharged During Year 1914:			
Discharged to Their Own Custody.....	4,397	1,351	5,748
Discharged to Custody of Relatives or Friends	386	122	508
Discharged to State Board of Charities.....	3	1	4
Discharged to Federal Government.....	1	1
Discharged to Social Service Bureau.....	23	16	39
Transferred to Department of Public Charities	240	104	344
Transferred to Other Institutions.....	12	13	25
Transferred to Other Wards of Bellevue Hos- pital	405	148	553
Eloped from Ward.....	2	2
Died	220	65	285
Total.....	5,688	1,821	7,509
Patients Remaining in Wards December 31, 1914..	90	43	133
Total.....	5,778	1,864	7,642

The number of prisoners admitted during the year was 1,075—678 men and 397 women, who were disposed of in the following manner.

There were 579 prisoners—368 men and 211 women, who were sent to various Magistrates' courts. These were prisoners who had shown evidences of illness and injury at the time of their arrest and before they had had an opportunity to be arraigned in court. These patients were treated until such time as their physical condition would permit their appearance in court.

The number of prisoners returned to City Prisons was 160—99 men and 61 women. These were patients who had developed symptoms of illness while in custody and were transferred to the Prison wards of this hospital for treatment.

There were 59 patients—32 men and 27 women, who were transferred from the Prison wards to the Workhouse. These were patients who had been sentenced to the Workhouse but before their transfer to that institution developed symptoms of illness and were sent to the Prison wards for treatment.

There were 23 patients—17 men and 6 women—who were returned to the House of Detention, and there were 24 women returned to various Correctional institutions, such as the Magdalen Home, House of the Good Shepherd, Florence Crittenden Mission, etc.

During the year there were 82 patients—69 men and 13 women, discharged by order of the Chief Magistrate. These were cases which were committed to Bellevue Hospital under the Boylan Law as habitual drug users.

Forty-one cases—33 men and 8 women, were discharged to their own custody. This group includes patients who were committed to the Workhouse for short periods and whose term expired while under treatment here; also cases released from custody and discharged to their relatives or friends after sufficient bail had been provided.

There were seven men returned to various County Jails, and two men discharged to the State Hospital authorities.

During the year, 26 patients—6 men and 20 women were transferred to the other wards of Bellevue Hospital. Most of these cases were suffering from surgical conditions, requiring major operations and were transferred as prisoners to the surgical wards.

The number of deaths during the year was 41—29 men and 12 women.

On January 1st, 1914, there remained in the wards 24 prisoners—14 men and 10 women and on January 1st, 1915, there remained 55 patients—30 men and 25 women.

The following table shows the number of prisoners discharged:

	Men	Women	Total
Prisoners Remaining in Wards January 1, 1914...	14	10	24
Prisoners Admitted During the Year 1914.....	678	397	1,075

Total.....	76	24	61	70	490	215	627	309	936

In concluding this brief report, I wish to express my gratitude to my associates in the Psychopathic and Alcoholic Services for their able assistance, and to the General Medical Superintendent and the Honorable Board of Trustees for their interest and support in the work of this Department.

M. S. GREGORY.
Director,
Psychopathic and Alcoholic Services.

REPORT OF DIRECTOR OF LABORATORIES.

To the General Medical Superintendent of Bellevue and Allied Hospitals.

Sir: I have the honor to submit the annual report of the Pathological Department of Bellevue Hospital for the year ending December 31, 1914.

The most noteworthy event of the year, indeed of the history of the Pathological Department of the Hospital since its foundation ten years ago, was the transfer of the morgue, or the city mortuary, on the last day of the year from the dock at the foot of East 26th Street to the Pathological Building. The repeated pleadings of the Director since the occupation of the building on June 24, 1911, were refused a favorable hearing, despite that every reason made this step advisable. The delay has seriously inconvenienced the department in the performance of its work. This is, however, not the proper place to enter into a discussion of the causes which made this deplorable delay. The Director takes this opportunity to congratulate the honorable Board of Trustees and the present Department of Public Charities (which acts as the official morguekeeper of the city) upon this salutary change.

The routine work of the department is steadily increasing in amount in breadth and in character. There were examined 1,270 surgical and gynaecological specimens; 1,025 blood cultures were taken; 3,603 miscellaneous specimens were reported, and 14,572 Wassermann reactions or blood tests were made; 428 Necropsies were performed.

I stated in my last report that the Director has called to the attention of the Executive Committee, of which he is a member, the necessity of changing the method of bringing the pathological specimens, with the necessary information, from the operating rooms to the laboratory. With the advent of a paid resident house physician and surgeon, the outlook for the future is brighter, for it will be possible then to overcome the trivial difficulties which now seem insurmountable. These more or less permanent house staff officers will keep accurate clinical and pathological records of service to medicine in its broader sense, and furnish accurate legal proofs of disease and accident. Nothing less should be expected and demanded by a city which has expended so much money and given such careful consideration to the needs of its ailing humanity.

Again I should call attention to my last year's report to the condition of the Out-Patient Department, from which I quote: "The Out-Patient Department requires the services of a clinical pathologist, who should be constantly on duty during the hours in which the patients are received, in order that the necessary examinations may be promptly and correctly made and reported. The clinical pathologist should also take the blood of the patients for the Wassermann reaction, thus obviating the inconvenience of having the patients come over to the main laboratory, a walk of three blocks. He should also be able to devote his time to the Social Service Bureau, which is doing a most deserving and charitable piece of work for the poor."

The Out-Patient Department and the Director have called to the attention of the Executive Committee, and the latter to the Board of Trustees, the anomalous and anachronistic situation of one of the principal diagnostic functions of the hospital, namely, its Out-Patient Department. A similar situation exists in the

VIEW OF OLD BUILDING SHOWING BALCONIES

dispensaries of the allied hospitals. There are no facilities for analyzing urine, for examining blood smears or making blood counts, briefly, for doing any one of a number of simple tests, which should be done regularly in every dispensary. Is the notable progress in medicine to be merely book lore, unavailable to the poor, not to mention the educational advantages to be derived from the pursuit of such information by students of medicine, internes and the attending staff and pathologists? It is a debatable question if relief so poorly carried out is worth doing at all; in fact, if it does not do as much harm as good. The pathological internes of the respective divisions render good service in drawing blood from patients for blood tests, and they also make a number of examinations of smears; it is quite impossible, however, for them to devote all their time to the dispensary without embarrassing the work of the wards to which they are attached. The crying need of the situation is men and intelligent organization; in Bellevue, a larger dispensary building, the one in use at present being too small. It will be a number of years before the new dispensary will be built. The Executive Committee is making recommendations to the Board of Trustees, which it is expected will relieve somewhat the difficulties which now exist in properly caring for the dispensary.

It is not pleasant to contemplate the fact that the medical profession will be considered responsible by laymen, through circumstances over which they have no control and which prohibits them from making a thorough examination of their patients.

The usual number of blood cultures were taken. It is unnecessary to dwell upon the diagnostic value of such tests which are performed without inconvenience or danger to the patients and which yield important therapeutic and prognostic clues.

The routine examination of the feces and urine of the convalescent typhoid patients of Bellevue and Allied Hospitals has been continued as in the past in the laboratory of Bellevue Hospital.

Bellevue Hospital	112
Harlem Hospital	0
Fordham Hospital	20
Gouverneur Hospital	45

14,572 Wassermann reactions were made, of which 294 were done for Gouverneur Hospital. Fordham Hospital performs its own blood tests and also Harlem Hospital, which, however, obtains its materials for the test from the Bellevue laboratory. "The importance of determining the percentage of positive Wassermans in all patients admitted to a large general hospital has been recognized for a long time and statistics on this matter have been collected for several years in the large foreign hospitals. The value of obtaining correct statistics and diagnoses in this important class of cases needs no argument at this time and it may be said that the data obtained has been of great assistance to the visiting physicians and surgeons and to the Pathological Department. Furthermore, there are important lines of research work relating to the exact significance and explanation of this reaction which opens up a wide and fruitful field of investigation." In conjunction with the Department of Health, the laboratory is making a statistical study of their findings in this important field of research and therapeutics which will be published some time in the future.

The criticism which has been made during the past year of the value of the Wa. R. has been plentiful and hasty as it was based on insufficient evidence and, curiously enough, has come from physicians from whom one would not have expected it. With the Department of Health the laboratory has been making a serious investigation upon the value of the various antigens and other material involved

in the test, in order that the latter may be standardized so that the reports from the various laboratories will be, as far as possible, comparable and on a uniform basis. The experience of the department has been that the reports of the Wa. R. of the department laboratory agree with the necropsy findings—a confirmation of the accuracy of the reports of considerable importance. It is true that the specificity of the reaction has not been proven in an absolute manner, and it will require further investigation to determine the limits of accuracy of this test upon an unequivocal basis.

The large chemical room on the fourth floor, which was last year turned over to the Research Bureau of the Department of Health, under the direction of Dr. William H. Park, for serological investigations, is still occupied by them.

Through the courtesy of your Honorable Board, by placing at the disposal of Dr. Wadsworth and Miss Kirkbride two horses and the use of the stable, they have been able to furnish the visiting staff with an anti-pneumococcus serum for the treatment of patients suffering from lobar pneumonia.

The bi-monthly reports of the Director on the work of the laboratory to the Executive Committee have enabled the latter to familiarize itself with the work of the department and have been of signal value to the Director.

In the last year's report I called attention to the desirability of instituting reforms in the numerous clinical laboratories of the hospital. It has been considered best to delay the introduction of a scheme to accomplish the end in view, until the paid house physicians and surgeons are appointed. With the constant changes in the personnel of the staff, it was not considered possible to insure uniformity in the method of examination and the records of these laboratories.

The chemical floor is now fully equipped and prepared to perform routine examinations along metabolic, chemical and physical lines. A large amount of routine work along these lines has been done and research work of considerable importance and promise has been started and in some cases finished. With the appointment of a resident chemist and physicist, it will be possible to coordinate more thoroughly and effectively the work of the laboratory and the hospital. It must be remembered that the chemical floor is still undermanned. In last year's report, the Director called attention to the need of one of the small wards in the new surgical building adjacent to the Pathological Laboratory, as a metabolism ward for the laboratory. This request is urgently renewed. The development of the chemical floor has enabled the department to become closely united with the prison and alcoholic wards—an important line of research work along toxicological and chemical lines has been started which promises to yield valuable results in clinical and medico-legal medicine.

The work of the department for the past two years will be published in the medical and surgical reports of the hospital.

Respectfully submitted,

CHARLES NORRIS,

Director of Laboratories.

REPORT OF GENERAL SUPERINTENDENT OF TRAINING SCHOOLS
FOR NURSES.

To the Board of Trustees, Bellevue and Allied Hospitals.

Gentlemen:—I have the honor to present the following report for the year 1914 of the Training Schools for Nurses attached to Bellevue and Allied Hospitals, together with a list of the Board of Managers.

BOARD OF MANAGERS, THE BELLEVUE TRAINING SCHOOL FOR WOMEN NURSES
(INCORPORATED 1874).

MRS. WILLIAM PRESTON GRIFFIN, Honorary President.
MRS. WILLIAM CHURCH OSBORN, President.
MRS. ROBERT HUNTINGTON, First Vice-President.
MISS HARRIETTE ROGERS, Second Vice-President.
MRS. RICHARD MORTIMER, Secretary.
MRS. ELLIOT BENEDICT, Treasurer.

Mrs. George Blumenthal, Mrs. Linzee Bladgen, Miss Mabel Choate, Miss Caroline Choate, Miss Eleanor de Graff Cuyler, Mrs. Paul Dana, Mrs. Edward P. Fowler, Mrs. J. M. Goetchius, Mrs. William H. Hyde, Mrs. Alfred Hess, Miss Iselin, Miss L. Iselin, Miss Louise Kane, Miss Elizabeth Kean, Miss Anna Lusk, Mrs. Grant La Farge, Mrs. Alexander Lambert, Miss Ruth Morgan, Miss Blanche Potter, Mrs. William H. Polk, Mrs. Gifford Pinchot, Miss Mary Parsons, Mrs. Whitelaw Reid, Mrs. Francis M. Scott, Mrs. Howard Townsend.

MANAGERS—EX-OFFICIO.

JOHN W. BRANNAN, M. D., President, Board of Trustees.
JOHN A. KINGSBURY, Commissioner of Public Charities.
S. S. GOLDWATER, M. D., Commissioner of Health.

ADVISORY COMMITTEE ON FINANCE.

MR. WILLIAM CHURCH OSBORN, 71 Broadway.
MR. FORD HUNTINGTON, 18 Cortlandt Street.

The Edith Summer Home at Belle Island, Conn., maintained by the Board of Managers as a Vacation Home for Nurses, open from July 1st to September 1st, entertained nurses who spent from two to four weeks.

Since the establishment of the School 1,021 women have graduated.

The following is a summarized statement concerning the graduates:

Private Nursing	274
Married	230
Institutional Work	125
At Home	139
Social Work	49
Practicing Medicine	11
Deceased	114
Army	5
Unknown	33
Still in School.....	41

GOUVERNEUR HOSPITAL

ADMINISTRATIVE CHANGES—NEW DEPARTMENTS.

BELLEVUE HOSPITAL.

Miss Anna James resigned as Office Assistant to accept a position elsewhere. She was succeeded by Miss Anna Hein, who was promoted from the Head Nursing Staff.

One additional assistant, salary supplied from private source, has been allowed—Miss Marian Rottman, whose admirable work in preparing specifications for equipment for L. & M. and previous experience made her a suitable candidate, was appointed. Inasmuch as teaching, ward supervision and clerical work, together with the reception and distribution of equipment for new buildings had outgrown the Office Staff, this additional appointment was greatly appreciated.

In addition to the numerous minor changes in graduate staff, several changes have been made in the night supervisory staff. As reported last year, this is due very largely to small salaries, heavy responsibilities and long hours.

HARLEM HOSPITAL.

Miss Mabel Wilson succeeded Miss Blanche Pfefferkorn as First Assistant. Miss Margaret Maloney was transferred from Fordham Hospital to fill Miss Pfefferkorn's vacancy.

FORDHAM HOSPITAL.

Miss Maloney, Assistant Superintendent, was transferred to Harlem; vacancy temporarily filled.

Two additional graduates allowed; one in charge of the X-Ray and Dental Clinic, one as Assistant Night Supervisor.

GOUVERNEUR HOSPITAL.

Miss Julia Donnelly was transferred from a head nurse position to that of assistant supervisor of nursing, in order to secure more and better supervision of ward nursing service.

Many conferences were held during the year with special committees and individual members from the Standardization Bureau, with a view to standardizing requirements, titles and salaries of nurses employed in municipal hospitals and field service. As this was in line with the efforts made by this department for many years, such opportunity for study and support was eagerly grasped. In order to retain competent nurses for the more important positions, supplemental financial aid from private sources has been supplied. This is necessarily limited and inelastic. It was hoped to secure a system of automatic increase in salaries, thus eliminating the necessity for outside assistance, and thereby gaining a more stable and efficient administrative and head nursing staff. The nursing budget was, therefore, carefully prepared for 1915, under the advice of the Standardization Bureau. Consequently when no additional appropriation was allowed, we found ourselves facing another year's work under exactly the same conditions.

Few changes have occurred in the internal arrangement at Bellevue Hospital.

One ward has been set aside for the treatment of male drug habitues, following the enforcement of the Boylan law. This, together with the fact that such cases were also being committed to Wards 30, 34, 35 and 44, made it necessary to ask for twelve additional graduate nurses. As the Nurses' Residence was already entirely filled, salaries sufficiently large to enable such workers to live

outside were secured. In order to secure space for such patients, two Genito-Urinary Services were brought together in one ward.

Every effort has been made to perfect the equipment, routine nursing procedures and housekeeping details, in order to secure a higher type of nursing care and effect economies.

The Central Linen Room reported as started last year, has continued to develop. Gradually, one class of ward linen after another has been centered here, to be given out in daily exchange, until no further growth can ensue without increased floor space.

The laundry was moved from the Nurses' Residence shortly after January 1st, 1914, thus bringing all the laundry work under one roof and one management. It has gradually worked out in a satisfactory manner. It is earnestly desired to assume the responsibility of doing all the laundry work for the employees. (Part is being done now.) This cannot be accomplished, however, until additional machinery is added and more workers are secured.

GRADUATING EXERCISES.

Graduating exercises were held at the Nurses' Residence April 20th, at 8.30 P. M. Doctor John W. Brannan, President of the Board of Trustees, presided. Reports were read by the secretary of the Women's Board of Managers and by the General Superintendent of Training Schools. The address to the graduating class was made by Judge Francis M. Scott. Diplomas were awarded to forty-one graduates.

PUPIL NURSE INSTRUCTION.

Four groups of pupils entered during the year.

March 15th—Eleven reported. Three withdrew. This group of eight, combined with the sections of September and December of 1913, making up the present intermediate class of forty-one pupils.

September 1st, 1914—Twenty-nine pupils reported.

December 15th and 31st, 1914—Twenty-nine pupils reported.

Twenty-four are still in school of first group. The last group has been in the school too short a time to give a final report.

Although too early to give statistics, we feel encouraged with the results following our efforts to build up our pupil nurse body. The maintenance of a definite minimum educational standard, as prescribed by the Board of Regents, has resulted in larger classes of better prepared women.

For part of the year, two pupils from the Department of Nursing and Health at Teachers' College have been in residence at Bellevue on the scholarships referred to elsewhere. These pupils render valuable assistance with the teaching.

In addition to the usual course of lectures and classes in theoretical and practical instruction, classes in Italian and German have been regularly conducted.

POST GRADUATE COURSES.

The inquiries concerning post graduate courses have continued in about the same numbers. The records of each have been carefully investigated, with a view to maintaining the standards required by the Board of Regents for registration of schools of nursing. The number of post graduates entering has been somewhat reduced, owing to increase in the number of affiliating pupils from other schools and growth of student body.

AFFILIATIONS.

The requests for affiliation from schools in the state, as well as outside the state, have continued. These affiliations now number 35 and are distributed as follows:

Bellevue	15
Harlem	9
Fordham	9
Gouverneur	2
Total.....	35

The report of 1910 showed but 13 schools affiliating with Bellevue and Allied Hospitals. These have not only increased to 35, in something over four years, but there has been a decided effort to send more pupils for longer courses.

One of the most interesting affiliations, and the first of its kind, has been effected between the Bellevue School of Nursing and the School of Philanthropy of New York City, whereby a candidate who wishes to prepare herself for Medical Social Service may by spending two years at the Bellevue School and one at the School of Philanthropy secure a diploma as a nurse and one as medical social worker.

SCHOOL FOR ATTENDANTS.

During the year pupil attendants were detailed to all the men's medical wards in Pav. A and B, replacing orderlies. Fourteen additional pupils were needed for this purpose, but no increase in appropriation was required. The greater stability and efficiency thereby secured has been most gratifying.

On January 21st, 1914, eleven pupils were awarded certificates. Six went to the Butler Hospital Training School, in order to complete their training and secure a nurse's diploma. Six graduates from the school are satisfactorily filling positions in the Psychopathic and Alcoholic Wards. One had been detailed to the Amphitheatre.

APPLICATIONS FOR EXECUTIVE WORKERS.

We have received thirty-nine requests to supply graduate nurses for important positions outside the Hospital. It is rarely possible to fill these, as the need for well trained institutional workers in the Allied Hospitals is much larger than can be supplied from our own graduates.

It is interesting to note that twenty-six out of the last graduating class of forty-one remained in the Hospital as head nurses.

SOCIAL SERVICE.

This Department fills such an important place in the administrative and nursing scheme of the Allied Hospitals that a special report covering its activities will be found elsewhere.

VACATION RELIEF.

Five thousand dollars was again appropriated for "Vacation Relief" for Bellevue Hospital. This enabled us to give to all graduates and pupils entitled to such vacations (May 1st to October 1st), varying in length from ten days to one month, according to length of service and general ruling. As the Hospital continued very heavy during the summer, it would have been impossible to grant these vacations without this additional allowance.

MISCELLANEOUS.

I again beg to emphasize the urgent need for the addition to the residence for nurses at Bellevue Hospital. We have forty-one nurses living outside our residence, at an approximate cost of \$8,000 a year over and above their salaries. We have utilized every bit of available space in the residence and with the opening of new buildings more nurses will be required. Osborn Hall is filled and the problem of securing suitable living quarters near the Hospital, even if salaries sufficiently large to pay for such are supplied, is an important consideration.

At Harlem the residence, reported as practically ready for occupancy last year, is still lying unused, owing to delay in the installation of lights. The houses now occupied by nurses are most uncomfortable and undesirable and the genuine need for the new residence is very real.

At Gouverneur more room is needed for nurses. The three houses on Monroe Street are inadequate, insufficient bathing facilities, overcrowding and no class or lecture room, making the problem of teaching difficult. In order to hold our affiliated schools, upon whom we are largely dependent for the nursing care of the patients, we should be able to house the pupils comfortably and give the required instruction.

HEALTH OF NURSES.

All affiliating pupils are now required to have typhoid vaccine before reporting.

We are glad to record the total absence of typhoid fever among the nursing staff in all hospitals during the year.

We regret to report that two deaths have occurred; one, an affiliating pupil at Bellevue, following an operation for mastoiditis; one, graduate head nurse at Gouverneur from suppurative jaundice.

Statistics showing number of pupils admitted, number of applications and inquiries issued, the census of the School, etc. Also tabulated lists of illnesses will be found in separate Report of Training School for Nurses.

We again wish to express our appreciation of the excellent care given to the members of our nursing staff by the Minturn Hospital, and to the various members of the Visiting and House Staff who have so promptly responded to the many and numerous calls made upon them, both at Bellevue and the Allied Hospitals.

In concluding my report, I wish to record my appreciation of the loyal support and efficient work of all those who have been associated with me during the year in administering the work of the Training School in all its departments. To your Honorable Board and to the Board of Women Managers and the General Medical Superintendent, I wish to express grateful appreciation for continued assistance and support.

Respectfully submitted,

CLARA D. NOYES, R. N.,

Gen. Supt. Training Schools.

HARLEM HOSPITAL

REPORT OF DIRECTOR OF DENTAL SERVICE

To the President and Board of Trustees
of Bellevue and Allied Hospitals.

My dear Sirs: I desire to make the following report of the Dental Service in Bellevue, Gouverneur, Harlem and Fordham Hospitals for the year 1914.

While the work at the various hospitals is of a most excellent character and the amount of work accomplished is quite satisfactory, there could be a greater amount of work accomplished with improved equipment.

May I call to your attention that Bellevue, although the most important of the institutions, has the least up to date equipment, although it is doing more work in the Dental Department than all of the other hospitals combined. The showing of 10,023 dental operations, of all descriptions, at Bellevue, as against 5,956 for the preceding year, shows how the work has grown in this institution.

The work of Harlem under the direction of Visiting Dentist Dr. Marie MacElroy, has been most satisfactory and shows an increase of the operations, viz. 601, although the same number of patients have been treated.

At Fordham Hospital, under the direction of Visiting Dentist Dr. W. H. Mork, there has been a very notable increase in work. Last year 874 operations were reported and this year 2,060; more than twice what was done last year, the number of patients having increased greatly in the year.

At Bellevue the number of operations have been nearly doubled, which I believe gives evidence of the wisdom of a dental interne on the premises.

An examination for a dental interne at Bellevue and one at Gouverneur will be held early in April, so as to be prepared to make recommendations for internes for these institutions the first of July. I would recommend, if possible, a dental interne also be installed at Harlem and Fordham.

Respectfully submitted,

HERBERT L. WHEELER, D.D.S.,
Director Dental Service.

REPORT OF SOCIAL SERVICE BUREAU

To the General Medical Superintendent.

Sir: I have the honor to submit the following report of the Social Service Bureau of Bellevue and Allied Hospitals for the year ending December 31, 1914.

Besides the usual routine work, the Social Service Department of Bellevue has made a special study of the results of the combined medical and social work of the evening Clinic for Cardiac Patients maintained by Bellevue Hospital under the direction of Dr. Hubert Guile. This will form the special report of the Social Service Bureau for the year.

A progressive step taken this year is that of the affiliation of the Bellevue Training School for Nurses with the New York School of Philanthropy for the training of medical social workers. By this arrangement women of the requisite educational qualifications who take a two years' course in the Training School for Nurses and one year in the New York School of Philanthropy will receive diplomas from both schools, one for the profession of nursing, the other for the profession of medical social service, thereby securing for themselves a very wide field for future activities, a field where at present the demand for proficient workers is many times greater than the supply.

In our report for 1913 we suggested that a vast amount of preventive, and therefore of humane and economic work, might be accomplished from the Hospital as a Health Centre had we a staff of workers large enough to do thorough follow-up work in the families of all patients admitted to Bellevue.

Pursuant to that idea our workers made a survey of a group of twelve hundred and seventy ward patients and nine hundred out patients to determine how many individuals we might thus reach. Of the ward patients approximately 53 per cent. were men, 31 per cent. women and 16 per cent. children. Of the entire number (2,170) about 59 per cent. represented families with an average of five individuals to each household. As the yearly admission of new patients to the clinics is about forty thousand, and to the wards about forty thousand also, a little computation will show what an effect upon the health of the city such a comprehensive plan of home visiting might accomplish if well carried out.

The Tuberculosis Division has made progress, although the stress of meeting the present financial obligations has made it impossible to undertake any new venture in 1914. Statistics have shown that there has been a distinct decrease in the number of deaths from tuberculosis in the district under our care and that a smaller number of new cases has been discovered. The patients under our care have been helped through the Day Camp, the Settlement House and the work of the Social Service nurse in the wards. There has been frequent overcrowding in the various departments and the Tuberculosis Clinic is in need of additional workers. The Auxiliary Committee have been very constantly at work trying to meet the urgent needs of the patients and in making satisfactory arrangements for their care. The Committee are grateful for the generous support which they have received.

The Free Synagogue has established a "Children's Haven" at Rockaway, Long Island, for the care of well children whose mothers are ill in Bellevue. This is in response to one of the most urgent needs in the community, and is in line with all the forward constructive work of the Free Synagogue Committee.

CHILDREN'S WARD, HARLEM HOSPITAL

Six graduate nurses have taken the Social Service Bureau's short course in practical work.

Harlem Hospital Social Service has given special attention to its children's service, co-operating most satisfactorily with the school nurses' work in the care of cardiac children.

Fordham is trying out the plan of visiting every patient upon his admission to the wards to learn if assistance is needed, and these workers have adopted the visible index filing system for their records, finding it very satisfactory, especially in keeping pending cases before their notice. An unusual amount of Fresh Air Work was accomplished last summer, 823 children having been sent from the families of hospital and dispensary patients.

Gouverneur Hospital has done a fine piece of constructive work in fostering trade training in the Convalescent Home for cardiac patients.

Our various committees have met weekly at Bellevue and fortnightly in the Allied hospitals throughout all but the summer months. Their untiring interest and support have greatly widened the scope of our work.

The enthusiasm and earnestness of the staff workers has continued unabated. All look back upon their year's work with grateful appreciation for the opportunities for helpful service it has offered them.

In conclusion I would like to express the Bureau's appreciation of the place which has been accorded it in the Hospital's affairs through the cordial support of the administration and the ready co-operation of doctors, nurses, and in fact of every one connected with the institution.

Respectfully submitted,

MARY E. WADLEY,
Executive Secretary.

FORDHAM HOSPITAL

MEDICAL AND SURGICAL REPORTS FOR 1914.

The medical and surgical statistics of the four large hospitals comprising the Department of Bellevue and Allied Hospitals and here presented in the terms of the International Classification.

As this classification is the one that has been adopted by most all civilized governments these statistics are thus comparable with governmental reports and the compilation of State and City Registrars for vital statistics.

TABLE I.

DISCHARGES AND DEATHS (EXCLUSIVE OF STILL BIRTHS) FROM ALL DISEASES IN BELLEVUE AND ALLIED HOSPITALS, 1914, IN TERMS OF THE INTERNATIONAL CLASSIFICATION.
